

Wood Spirit Measurements (Exaggerated)

Face Divided into equal thirds or exaggerated

- From hair line to mid-eyebrow
- From mid-eyebrow to bottom of nose
- From bottom of nose to chin

Eyes – 3 Eyes wide plus some (no ears)

- One eye width between eyes (bridge of nose)

Center of lips are about 1/3 distance from bottom of nose to chin. The bottom of the lip is about in the center from the bottom of the nose and chin.

Width of nose is in-line with the inside of the eyes. I prefer a bigger nose on my Woodspirits, so I exaggerate this feature.

The corners of the mouth are in-line with the center of the eyes.

The ears are between eyebrow and bottom of nose. The older you depict a Woodspirit, the longer the ears.
